

Pierce County Environmental Services Building

Tacoma, WA

Reclaimed Resources

Pierce County rejuvenated a gravel mine, to include a golf course, arboretum, sports fields and an environmental education center.

APA developed indoor and outdoor exhibits that interpret Pierce County's environmental services. Topics include the building's sustainable design, the site's history and geology, gray water reclamation, landscaping and erosion control. Exhibits highlight personal relevance to visitors' daily lives and instill a sense of responsibility for the environment.
