

# Vancouver International Airport

Vancouver, BC

## A Destination in Itself

Vancouver International is Canada's second busiest airport. An observation deck in the domestic terminal's pre-security area provides a close look at the planes and operations on the runways below. With floor-to-ceiling windows and—now—an interpretive experience, visitors dive deep into the airport's operations.

AldrichPears worked with the Vancouver Airport Authority to create the flight-related interpretive experience—a one-of-a-kind experience in North America. Visitors get the inside story on the airport's operations from personnel duties to planes and equipment. Through interactive media kiosks, telescopes and vivid graphics, visitors connect to the real thing as they see it in action. Rich stories highlighting the natural and cultural history of the region also let visitors connect to the airport's home—Sea Island.
