

Lake Winnipeg: Shared Solutions at The Manitoba Museum

Winnipeg, MB

A Future Watershed

The Lake Winnipeg watershed is unique — and endangered. *Lake Winnipeg: Shared Solutions* challenges visitors to consider integrated solutions that balance environmental, economic and social factors.

APA collaborated with the Manitoba Museum and the International Institute for Sustainable Development to develop an interactive simulation of the watershed of the future. Visitors assume the role of “champions of change,” making decisions on policies and projects that impact the watershed. Visitors learn that solutions aren’t always straight-forward but they each have a part to play in protecting this precious resource.
