

# Space and Aviation Wing at Bursa Science and Technology Museum

Bursa, Turkey

## The Pull of the Skies

The Bursa Science and Technology Museum supports Turkey's goal of inspiring a new generation to pursue careers in science, technology, engineering, art and math. Its Space and Aviation Wing speaks to the country's aerospace aspirations.

APA worked closely with the Museum to develop aeronautic visitor experiences that bring scientific principles to life—flight, astronomy, and space navigation. In the Space and Aviation Wing, visitors explore dramatic environments while engaging with interactive exhibits. The Aviation Gallery invites visitors to explore the history of flight, from hot air balloons to today's rockets. The Space Gallery blasts visitors into the cosmos, allowing them to explore the cutting edge of space research.
