

# Canada Science and Technology Museum

Ottawa, ON

## Celebrate Canadian Innovation

The Canada Science and Technology Museum (CSTM) is the largest museum of its kind in Canada, fostering scientific and technological literacy through an astounding array of artifacts.

APA worked with CSTM curators to develop an innovative strategy that lets visitors explore their extensive collection using interactive, mobile and virtual-reality technologies. Organized into 4 core topics of Transportation, Resources, Knowledge and Technology and supported by a Maker Space and Demonstration Stage, the exhibits allow visitors to engage in multi-generational activities while revealing the relevance of science and technology in our daily lives.
