

Oltremare

Riccione, Italy

Life on the Adriatic through time

Oltremare is a large marine theme park dedicated to showcasing life in the Adriatic Sea and the Po River Valley.

AldrichPears planned and designed all their outdoor environments and two major indoor attractions. Experiences include a long interpretive journey through many cultural villages and natural zones. In the Planet Earth zone, visitors witness the formation of the universe as they wander through a large, multimedia environment, which features a compelling 3-D film and surprising 4-D physical effects that synchronize with the film. In the Darwin exhibition, visitors explore a living prehistoric landscape in a glass conservatory. In this portal to the past, visitors encounter live crocodiles, volcanic eruptions and other thrilling hazards along the way.
