

Pacific Pier at Ocean Park Hong Kong

Aberdeen, Hong Kong

Surf and sand, pinnipeds and people

The Pacific Pier exhibit at Ocean Park examines the connected worlds of seals, sea lions and people. AldrichPears created an immersive environment that recreates sea lion and harbour seal habitat found along the northern coast of California. APA developed a realistic natural environment of rocky headlands and sandy bays merged with the human environment of wooden wharves and walkways to interpret our relationship to pinnipeds. Visitors are able to experience the creatures at play, rest and work, both above and below the water.
