

Evergreen at the Brick Works

Toronto, ON

Build on the Past, Cultivate a Future

The Don Valley Brick Works is now a model of sustainability. The site's steward, Evergreen, aims to inspire and equip visitors to live, work and play more sustainably in their urban environment.

APA worked with a large, multi-disciplinary group to develop a visionary masterplan for visitor experiences at Brick Works. The site-wide plan illustrated community and stakeholders' priorities—from hydrology, geology and ecology to industrial history to a resource for sustainable urban living. The conceptual approach delineates visitor experiences, including a fossil dig, nature trail and interactive display of brick production within the original factory buildings.
