

Cape Breton Miners Museum

Glace Bay, NS

Deep Heritage

The Cape Breton Miners Museum presents the region's role in building the nation through its unique geology, mining techniques, equipment and people.

APA worked closely with Museum staff and specialty consultants to create a simulator that takes visitors deep underground to experience the demanding and dangerous work of mining in Cape Breton. Guided by the voices of retired miners, visitors see, hear and feel the immense pressure of working in the mines that extended under the Atlantic Ocean.
