

Redmond Wetland Complex

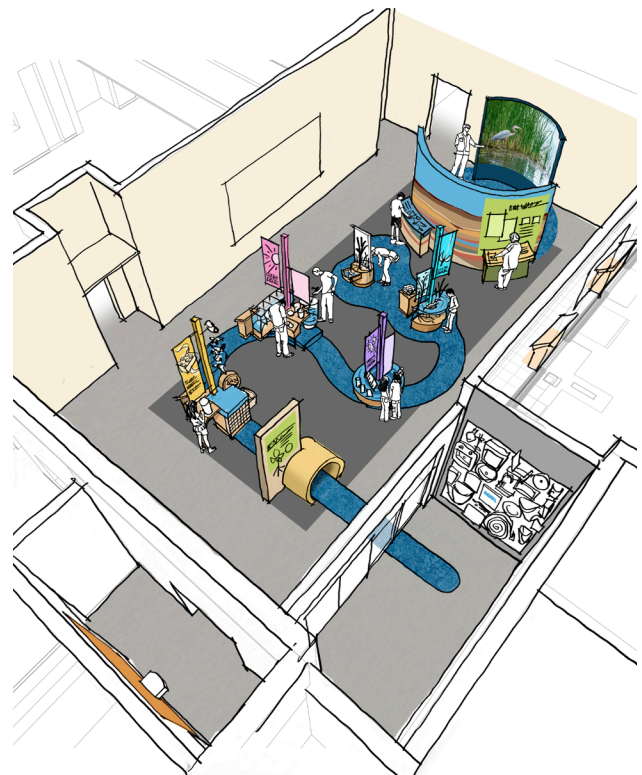

Redmond, WA

Become Fluent in Effluent

With a growing population, the City of Redmond's over 40-year-old wastewater treatment facility is due for an upgrade. The City has decided to expand its operations and take a more sustainable approach with its new Redmond Wetlands Complex in Oregon's High Desert.

APA is designing both indoor and outdoor exhibits for the Complex's visitor center and interpretive trails. Inside the center, visitors will "enter" a pipe and follow the treatment process, exploring each stage through hands-on activities, models, and digital interactives. Outside, visitors will explore interpretive trails through the Complex's wetlands, learning about the flora and fauna that are part of the innovative treatment process.
